

Debra Lynne Katz Target tasked by Debra Lynne Katz - DLK4

Remote viewed by Anita Ikonen - Method EEC

Tasking: frontloaded as an animal

Target no target number

Today November 1, 2018

Start 9:33 AM

November 1, 2018

Start 9:33 AM.

Debra Katz target. Animal #1.

I find green light airy vegetation, very light and delicate plant life floating in the air like leaves. The air too is very light and airy. A light airy delicate feeling from the target. This is a delicate animal, not ferocious or smelly or gross. There is a grace and delicate and airy feeling about the animal. It feels like not a killer. I see one black rock, about the size that it could be held up by a person's hands, a bit cone shaped, not very jagged almost smooth but not perfectly smooth.

Yellow and light green colors, could be meaning the sunshine and the leaves up in the air.

Height, the animal is slender and tall. It doesn't like to eat meat. It looks at meat on the ground and won't eat it. Delicate light yellow and light green colors. There is no bad smell here. It walks delicately not heavily not clumsily so it does not weigh much on its body and it does not stomp heavy feet.

It likes to go up. There is dead meat on the ground after a mauled rodent. But it prefers to eat seeds and nuts. It is high up in the leaves above ground. Very light green color of the leaves.

A bird beak. It doesn't smell bad here, even though there is the smell of the animal. It eats seeds. It climbs high up to see. There is dead meat on the ground and it won't touch it. The beak. It wants to decide for itself what it wants to eat. It looks at the meat but it goes high up to the tree. It likes to pick seeds from the ground. An elegant animal. Long neck, long legs, two legs. Dead meat on the ground after a mauled rodent. It cannot sit, it does not know how (is not able to sit down like people do like how people sit down on the butt and bend their knees, this animal cannot do that).

The light green color. The sunshine feels good for the animal. It eats seeds. It likes to go high up to see. It doesn't walk around a lot on the ground, prefers to stand still in one spot when standing on the ground.

A bird with two tall vertical stilt legs, the legs are bare without feathers.

9:55 AM I want to see what it is to know if my initial impressions were on target or off target. I have not taken this session very far, I am still unfamiliar with the different format as there is no target number to look at for instance so I struggle with that.

The target is a flock of sheep. There are no trees. It is not a bird. It cannot go high up to anywhere

the landscape is a vast endless empty treeless flat ground with dry yellow thick grasses. Grade F.

I wish there was the target number of the format 1234-5678 because I can look at the numbers and feel the landscape from the numbers plus locate the information at the numbers. Here I have no target number to look at and do not know where to locate the information.

9:58 AM End session. No drawing was made.
