

FBT5 Added session comment

March 26, 2019

Turns out this exercise was an ARV with two photos. [Tasker] obtained the results of a sports game match and then chose the picture that was corresponding to it and posted the picture. The two pictures were Cousin It and a person fishing. I may have gone to the other photo, which I guess might be a fail in ARV binary. I was not informed it was an ARV in advance and it was all confusing for me after the Cousin It photo was posted.

I have given this session the session index FBT5 for Facebook Targets, and have not listed it under ARV sessions. This is because I have done this session under the impression that it was a regular target.
