Noetic matching 12

Today March 11, 2019

Start 11:18 PM

Tall rising structure and wavyness beneath it.

Again I use strategy as first time used in previous target of this protocol, to pretend there are no five pictures below (five pictures are also concealed until later) and that this gray box connects to a feedback picture that will be in its place later.

Tall black pillar, blue floor, blue sky, and something of interest up on top of the pillar.

Probe black pillar: There is water. It is cold here. There is a basket on the floor is woven basket and of square shape.

11:30 PM I am getting too tired to do this it is late in the night. I look to see what the five picture options are.

Rooster, green snake, pouting child, castle with water trenches, the fruit bowl.

I choose the castle with the trenches of water. That is wrong, this target would have been the fruit basket again (well I did have a woven basket in my report).

11:32 PM End session and notes.
