

Noetic Sciences Target tasked by IONS - NS14  
Remote viewed by Anita Ikonen - Method EEC  
Target no target number  
Today March 12-13, 2019  
Start 1:38 AM

Noetic Target 14  
Today March 12-13 2019  
Start 1:38 AM

There are grids on the floor, and an interesting structure in the center.

The left side of the grid element slopes down on its interface to the ground there.

There are ripples at the grid.

Probing reveals that the flap above in the vertical is the same element as the grid on the horizontal.  
Air passes through the grids.

1:51 AM End session I am too tired it is late in the night. I will set the parameters for my answer now.

Feedback stage: The target is the pie on the cooling rack on the window sill. The system scored me with 32 out of 100, probably since I did not set it for having food, but I would grade this one rather good. The grid is there, and the shape above the grid would be the pie I presume. The ripples could be the heat or the wavy shape of the pie crust.

I am very happy with how this session went. Prior to this session I did several targets with the matching protocol at Noetic and was having a lot of bad results (bad correlation to target and wrong choice in one of five pictures) so it was refreshing and wonderful to come back now to a regular one-target protocol and to see such good results. The drawing I made for this session looks a lot like the target image, well done!

1:58 AM End notes.

#### ELEMENTS LISTING

IE. Grids on the floor.

SE. Left side of grid tapers down like a slope toward the ground there.

IE. Interesting structure in the center.

SE. Ripples at the grid.
