Noetic Target 28  
Today March 21 2019  
Start 9:51 PM

location: sofa, living room, family home in Sweden. Calm but people around.

Meditation prior to session.

9:53 PM

10:19 PM I end session now, I came up with the idea that I could RV these Noetic targets by looking at my drawing - this is how I always RV before, I would write the target number and draw! I started looking at my drawing now in this session but the drawing was already made and I added nothing new to it, I feel that I need to do it this way (by looking at the drawing instead of looking at the source page) from the beginning of a session.

First guess: Tropical nature

Second guess: Nature with a fence that has wooden poles and curvy rope railing

Third guess: none

Fourth guess: none

Feedback: The target is a lineup of British soldiers in the red uniform with the black hairy hats. Wow, another complete fail session, as those are rare. Interesting.

10:23 PM End notes.
